DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 3/13/07 have been fully considered but they are not persuasive as set forth below.

Claim Objections

2. Claims 1, 5 and 6 are objected to because of the following informalities: "at which" on line 3 should be --at said--; and "an other end" in line 6 of claim 1 should be --the other end--. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1, 5 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear as to what the applicant is trying to claim in lines 3-4 of claim 1.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. As best understood, claims 1, 5 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Fan (5,749,552).

Fan discloses a shower arrangement comprising a hollow wall bar (47), a water carrying wall connection (46) connected to one end of the hollow wall bar (47) and the other end is inherently connectable to a wall water supply and at least one shower coupling (the coupling where 40 is connected to and coupling where 56 is attached) at the other end of the hollow wall bar (47) such that the shower coupling is supplied with water through the hollow wall bar (see col. 2, line 44+). The arrangement further comprises a hand shower (48) attached via a shower hose (50) (see col. 2, line 52+) to the shower coupling via member (56). The arrangement further comprises at least one adjustable shower (42 via pivot joint inherently is adjustable) supplied with water through the hollow wall bar (47).

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3751

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
